

Educational Websites

Dear Parents,

I send to you a list of educational websites that your child can learn from after they complete their homework assignments. It is important that your child learns from different medians in order to receive a comprehensive learning experience. I invite you to use these websites as a supplement. A child can spend between 15 minutes to 30 minutes a day on the computer.

******Parents, for security purposes- it is important to first view the websites before allowing children to interact on the computer. Supervise your child on the computer at all times for their safety.**
